

7.2 Best Practices

7.2.1 – Describe at least two institutional best practices

Best Practice 1:

Title - Skill Development Courses

Objectives:

1. To create self-employment by the students.
2. To develop various skills based knowledge among the students.

Context:

Now a day's unemployment problem is very burning issues in the tribal society. The institution is located in remote, tribal and hilly area. Tribal community is unaware about various Govt. schemes due to illiteracy, low income, poverty, superstitions, malnutrition, seasonal migration, lack of infrastructure which results in rise the unemployment in this region. Therefore, to create self employment and to develop various skills based knowledge among the students is very essential in this area.

The institution itself bears all the expenditure charging only 100/- Rs. per students as a which is very less amount. The Institutes provides various opportunities of skill based knowledge among the students. The B. Vok, Computer course, Electrician course, Centering, Mason, Computer hardware, Tally course, Mobile Repairing, Language Lab etc. are the skill based knowledge which is given to the students.

Practice:

The institute has conducted various skill based courses by MOU with Udhog Vardhini, such as Mobile Repairing, Language Lab, Electrician course, Centering, Mason, Computer hardware, Tally course, etc. The language study and learning, the college created well furnished Language lab .The language lab has good quality material for the students as well as the staff members. Needy students registered their names to these courses and become trained which help to get employment easily.

Problems:

1. Resistance to adapt new change as career option
2. Lack of awareness of self-employment
3. Geographically Tribal and Hilly Area
4. Dependence on Public Transport
5. Lack of Education in Parents

Best Practice 2

Title - Plastic Free campus and Cleanliness Drive

Objectives:

1. To create awareness among the students about environment.
2. To boost the ideas of neatness and cleanliness among the students.
3. To Accumulate all the efforts of the students for cleanliness drive in society

Context:

The world is now in danger due to Global Warming. The Institute have taken an initiative to come up with a small step towards saving our planet. All the students are well aware of the need of something, which may help to save our environment for better future. This awareness is enough to understand the importance of action to be taken for preservation of our nature for next generation as being educated citizen of nation. There are various activities were conducted by the institute in focus to this context.

Practice :

For a purpose the institute have started with activity to keep the college campus a plastic free zone. The Students have taken this activity very healthily. They used to come by public transport. They keep the unused material with them to throw in the garbage bag only. The institute every year celebrate the Geography Day, on which the students get an important knowledge from the resource person called for the same. To create more awareness of plastic free and cleanliness the institute used to plan rallies and social act for people staying in nearby area of college. The Internship Programme of Cleanliness drive was conducted by college at Chaphecha Pada (Village) followed by lecture on importance of Plastic free zone and need of cleanliness.

Problems:

1. Resistance to adapt new change as career option
2. Lack of awareness of self employment
3. Geographically Tribal and Hilly Area
4. Dependence on Public Transport

Lack of Education in Parents
